

Playmat Care Instructions:

Storing your Playmat

Store the Playmat rolled up with the printed design on the outside in a cool place.

Prolonged exposure to bright sunlight may cause colours to fade slightly over a long period of time.

Cleaning your Playmat

Treat your playmat as you would any rug or carpet:

For dirt and light soiling, brush lightly with a soft brush or use a vacuum cleaner.

For heavy soiling the surface may be cleaned with proprietary carpet cleaner from your local supermarket.

Spills and Cleaning Tips

Firstly, you should never rub the surface. The correct way to approach a spillage or mark is to blot the area with a clean, absorbent cloth or white paper towel. Try not to make the spillage area larger.

Secondly, you should scrape up any excess spillage with a blunt knife or spatula.

For stains surface may be cleaned with proprietary carpet cleaner

NB: Before using any cleaning products on your playmat, you should always 'spot test' the mat to ensure the solution you are using will not damage or bleach the mat. Washing up liquid, abrasive cleaners or caustic solutions contain bleaching agents and these can damage the mat

Sport and Playbase manufactures high quality educational products from our base in West Yorkshire in the North of England. We are a second generation family firm with a dedicated, skilled and adaptable workforce with strong links to our local community.

For 30 years, we have been working closely with the education sector to ensure our products meet the demands of schools around the world. Our flexible processes allow us to develop specific products for individual markets.

All our products comply with relevant safety standards and exceed them where possible. We try to use raw materials that are as environmentally friendly as possible. We now use only phthalate free PVC. No polyester waste from the manufacturing process is sent to landfill. We use water based eco-friendly inks and all paper used is recycled.

For over 30 years we have been continuously developing our playmat materials to perfect the ideal hardwearing play surface for schools and nurseries. Our Carpet playmats are made from a 600 gramme 100% polyester surface with a synthetic and natural mix rubber backing. For our tiles and jigsaw puzzles we use a resin stiffened 1000 gramme polyester with an antislip rubber backing

We are experts in product development and producing our customer's own design products. For trade customers we can produce your own designs from a minimum of just 25 pieces. We turn your ideas into reality.
